T1V to showcase ThinkHub collaboration and ThinkHub Connect active learning software solutions at ISE 2019

T1V will be exhibiting at ISE 2019 for the first time in Stand 14-M228. Visit T1V to experience its latest innovations in BYOD collaboration and active learning technology, including ThinkHub, ThinkHub xCanvas, ThinkHub MultiSite, ViewHub Touch, and ThinkHub Connect.

For the first time in the company's history, T1V ThinkHub and ThinkHub Connect technology will be on display at Integrated Systems Europe at the RAI Amsterdam - The Netherlands, from February 5-8, 2019. This will be T1V's first time exhibiting at Integrated Systems Europe, the world's largest AV systems integration show, featuring the latest cutting-edge technology, products and solutions being produced for both channel and end-user professionals.

ThinkHub collaboration software consolidates the moving pieces of teamwork – devices, applications, people, ideas, and content – revolutionizing your team's ability to achieve great work, together. Whether you're giving a presentation, running a brainstorming session, strategizing, and more, our collaborative software allows you to engage with your peers and cultivate exceptional work in real-time, while saving time. ThinkHub is Built for BYOD™ (bring your own device) to support the many devices, programs, and platforms of today's meeting environments. For real-time, room-to-room collaboration, T1V will also be showcasing its **ThinkHub MultiSite** technology at ISE.

Making its trade show debut at ISE 2019 is **ThinkHub xCanvas**. Driven by customer demand, ThinkHub xCanvas extends the ThinkHub experience beyond a single display to multiple displays dispersed throughout a room. Imagine a room where you have a display on every wall, with the ability to place content anywhere in the room via touch or mobile device. The xCanvas also features snap grids, so once a content asset is dragged to the drop zone, the asset will snap into place at that grid's largest size and resolution. Displays can be touch or non-touch; non-touch displays will be controlled solely via mobile devices.

"T1V's VP of International Sales, Marco Ventura, recently moved to Amsterdam to focus on our European expansion, so we are thrilled to be able to have a presence at ISE in 2019 as we introduce some of our biggest innovations in collaboration and active learning to date..." says T1V EVP of Sales and Marketing, Adam Loritsch. He continues, "...Our product line continues to expand as we offer additional options and flexibility to our customers, and we've stayed laser-focused on ensuring our solutions are the most

intuitive and easy-to-use on the market. We're confident the ISE audience will be excited by what they see."

Also on display will be **ThinkHub Connect active learning technology**. ThinkHub Connect supports a variety of learning and teaching styles in the modern day classroom. The software provides instructors a powerful presentation tool, while enabling them to monitor and provide feedback on student work in real time. ThinkHub Connect is designed to enhance the learning environment for instructors and students alike - supporting the devices and programs that students and teachers utilize day to day. The solution also supports collaboration between students located at off-site locations and allows easy content sharing between remote locations.

ViewHub, T1V's BYOD wireless presentation tool, now supports single touch interactions with an enhanced version, **ViewHub Touch**. Users can annotate, reconfigure the order of screens or app windows shared to the ViewHub Canvas, or open a sketch window. Through AirConnect, ViewHub Touch users have the ability to clear any annotations made on their shared device screen. ViewHub Touch™ is also available for [ThinkHub Connect™ active learning classrooms](#), giving Student Stations the added capability of being able to annotate on shared content and create sketches to share to the ThinkHub Instructor Station.

T1V invites you to experience ThinkHub, ThinkHub MultiSite, ThinkHub xCanvas, ThinkHub Connect, and ViewHub Touch for in-person demos at Integrated Systems Europe, stand 14-M228.

About T1V

T1V is a visual collaboration company specializing in multitouch, multiuser software for enterprise and education markets. The company's collaboration platform includes ThinkHub® multitouch collaboration, ViewHub™ wireless presentation, and AirConnect™ mobile app - all working cohesively to support a seamless, intuitive user experience for both in-room and remote participants. T1V's suite of collaboration software represents total meeting room solutions that replace much of the hardware we equate meeting room technology with today.

T1V ThinkHub Connect™ active learning technology is designed to support a variety of teaching and learning styles, from traditional lecture to team problem-solving and group-based work. The solution also supports collaboration between students located at off-site locations and allows easy content sharing between remote locations.

All T1V solutions are Built for BYOD™ (bring your own device) to support the many devices, programs, and platforms of today's meeting and learning environments. T1V is a leading innovator in large-scale, interactive software technology, with four issued patents and two patents allowed in multitouch, multiuser software.
